Georgia Archives

Family Surname File Inventory

Last updated July 2022

These sources contain family research donated by Georgia Archives' patrons, as well as photocopied Bible pages and similar records. When this collection began, staff separated the African American family vertical files from the white family vertical files. This practice is no longer used. If you are searching for African American family surnames, you may wish to check both the BG (Black Genealogy) files and the other files.

Additionally, these donations included oversized genealogical charts. These large charts are organized by surname and are stored in a different location. The surnames denoted with (~~) have a genealogical chart. Ask Reference Staff to review these charts.

***BG – Black Genealogy*
